

## FIT100 Assignment 2

Visit the MGH or OUGL public labs and locate a Macintosh computer. Try out the Mac and notice features that are familiar and those that are different. Locate the browser, and check the class web page. Using the word processor, create and print a list *describing* in a sentence or two five features you find different, and five that are the same as the PC.

Due: Before Class, Monday 12 January 2004

Remember: Include your name, section and ID information
