Question Set 1. Reading and Modifying Code

Due Date: Wednesday, 9 January, 2002.

Please complete this assignment individually. Read these instructions carefully.

Read Topic 31 (p.171-176) and the Handout given in Class.

1. What is the last checklist item in the Handout and why does this matter?

2. What would you expect to see differently about a program written by coincidence and one written deliberately?

Please type your work. Make 2 copies of your work; one will be turned in and the other goes into your binder. Make things easy for the grader and any reader of your binder – repeat each question on your paper, and then answer the question right below it.
