  - ∗ 2B is due next Wednesday at 11pm

Project 2A

FIT100

1. Two-paragraph story
2. Words in the story that will be replaced by the user marked with <span> tags
3. An image that enhances your story
4. Set a background color
5. Input form for the user to enter words that will replace words in your story.
6. Copyright information for story and image.
7. Extra credit:
   - ∗ Validates to XHTML 1.0 Transitional
   - ∗ Validates to XHTML 1.0 Strict
   - ∗ More embellishments to make an attractive page using CSS

Project 2A Hints

FIT100

- Gender identity:
  - ∗ Use a "drop-down" or "select" box
  - ∗ Resources:
    - W3 Schools:
      http://www.w3schools.com/html/tryit.asp?filename=tryhtml_select2
    - Optional, extra-credit Lab 9

Project 2B Hints — FIT100

- Form tag syntax
  - `<form name="input" action="html_form_action.asp" method="get">`
  - In Project 2B, we want to stay on the same page, so use action="#"
  - Method is for server-side forms where the user input will stored in a database

Project 2B Hints — FIT100

- Form Inputs
  - Accessible for the blind using screen readers
  - XHTML compliant

```
<p>
    <label for="yourFirstName">Your first name:</label>
    <input type="text" name="yourFirstName" id="yourFirstName" size=15 />
</p>
```

Project 2B Hints — FIT100

- Form Inputs
  - Put them inside paragraph, or <p>, tags

```
<p>
    <label for="yourFirstName">Your first name:</label>
    <input type="text" name="yourFirstName" id="yourFirstName" size=15 />
</p>
```

Project 2B Hints — FIT100

- Form Inputs
  - Add a label tag to link up with the input

```
<p>
    <label for="yourFirstName">Your first name:</label>
    <input type="text" name="yourFirstName" id="yourFirstName" size=15 />
</p>
```

Project 2B Hints — FIT100

- Form Inputs
  - Id in the label matches id in the input

```
<p>
    <label for="yourFirstName">Your first name:</label>
    <input type="text" name="yourFirstName" id="yourFirstName" size=15 />
</p>
```

Project 2B Hints — FIT100

- Part 1, Step 2. Put script in <head> section
- Part 1, Step 5. Add onclick event to button. Give the button a name and an id. They should be the same. Put it inside paragraph, or <p>, tags

```
<p><input type="button" value="Tell a Story"
   id="storyButton" name="storyButton"
   onclick="tellStory();" /></p>
```
