Fetch gets it for you!

HOW TO CONNECT TO DANTE ON A MAC

Objectives

- Learn how to
  - Get (download) Web files from Dante
  - Edit them with Text Wrangler
 - Put (upload) them to Dante

Step 1

- Click on FETCH

Step 2

Hostname: dante.u.washington.edu

Username:

Connect using: SFTP

☑ Enable encryption

Password:

☐ Add to keychain

Cancel   Connect

- Type in your UW Net ID and your password and hit Connect
- Make sure SFTP is selected on the drop-down list and "Enable Encryption" is checked

Step 3

- Find the public_html at the bottom of the list
- Double-click public_html to open it
- public_html is the shortcut to *students* Web server
- Your default home page (index.html) will be in public_html

Step 4

- ## Editing Your File
  - Drag and drop your file to desktop.
  - ***Warning***: If you double click on the file, it opens with TextEdit—*not* what you want!
 - How to open with Text Wrangler….

Step 5

- **TextWrangler**
  - Click on the "Utility" icon on the desktop and find Text Wrangler on the menu that pops up. Click on its icon.
  - Select **File** from the menu (top left corner) and then click on **Open**.
  - Click on desktop (or wherever the file is saved) on the left pane and you will see your file on the right pane.
  - Select your file and hit **Open**.
  - Make the additions and save your file (**File** > **Save**).

Step 6

- ## Upload your file to Dante
  - Drag your file back into your folder on FETCH inside public_html.

Summary

- ## Learned how to

  - Get (download) Web files from Dante

  - Edit them with Text Wrangler

  - Put (upload) them to Dante
