

Homework 1: Lightbot

Goal: The point of this exercise is to start class enjoyably, and to set the context for the second lecture. Have fun!

Using the Firefox Web browser, visit <http://armorgames.com/play/6061/light-bot-20>. After the opening visuals, click “Play.” [You can shut down the music once you start.]

Part A: Work through all of the Basic Exercises by clicking on the leftmost square under basics; see red arrow in figure.

Part B: Work through the first 3 Recursion Exercises. These are a little more interesting.

Challenge, Part C [Optional]: Try Recursion Exercise 4. This is a more challenging problem, but definitely not impossible.

What to turn in. After trying Lightbot you should Submit a summary of your experiences at <https://catalyst.uw.edu/webq/survey/snyder/188485>
