# Creativity and Processing Design Document

**The point of this project is for you and your partner to create new and unique programs. These programs should be fairly short, 100 lines or less and do something interesting or engaging.**

Creative title for this project:

_____

What is the goal of your project (*i.e.* briefly explain your project)? How will it be interesting or engaging to the user?

_____

_____

_____

_____

What Processing constructs will you try and use? Think: functions, if statements, for loops, key presses, mouse clicks, color changes, and random elements.

_____

_____

_____

Sketch out what your project will look like visually. Your artistic skills are less important than communicating the idea clearly. Add text and labels when necessary. Use the back of this page to continue your ideas. The more sketches the better!
