Section 5: HW6 and Interfaces

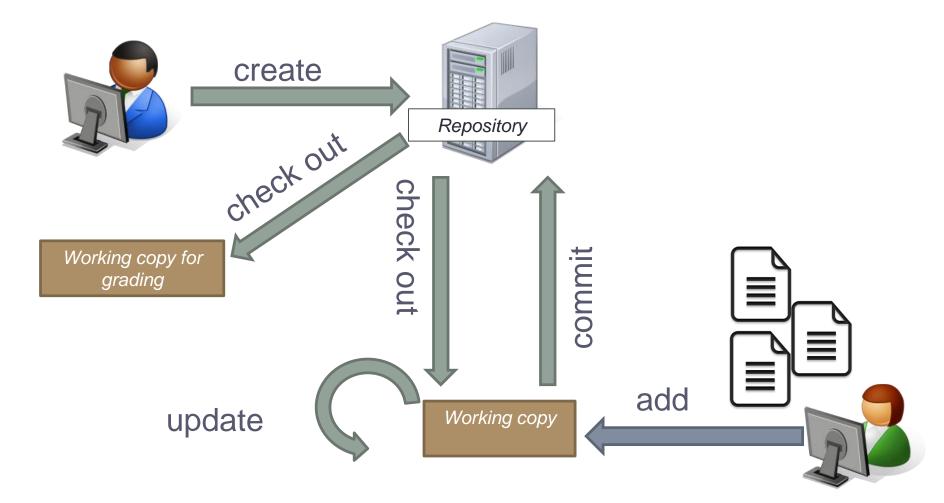

Slides adapted from Alex Mariakakis,

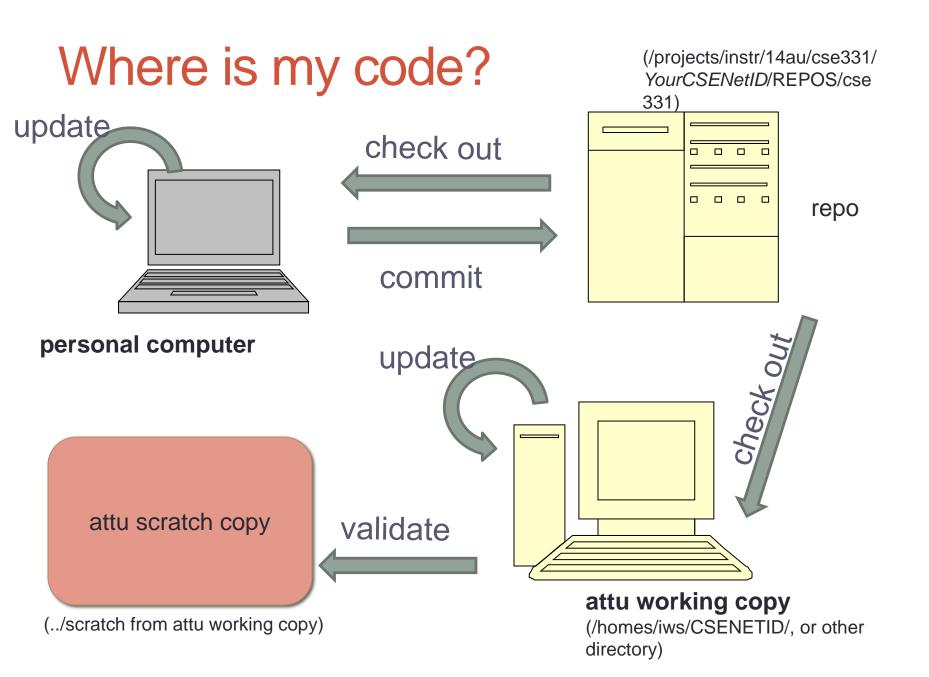

with material from Krysta Yousoufian, Mike Ernst, Kellen Donohue

Agenda

- Version control and tools review
- BFS
- Interfaces
- Parsing Marvel Data

331 Version control

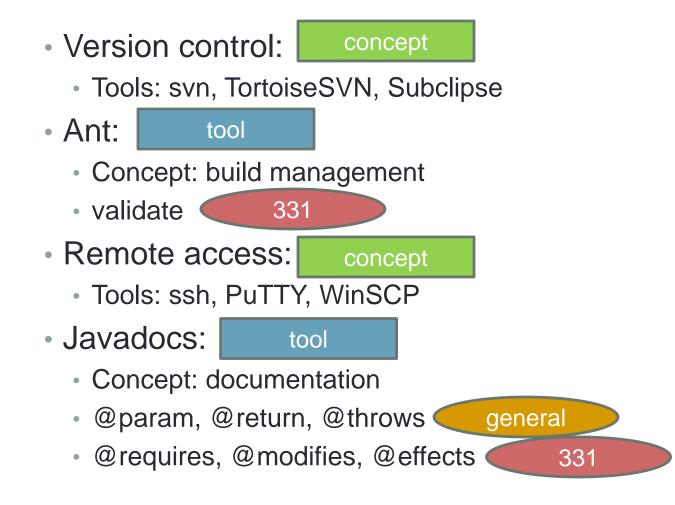

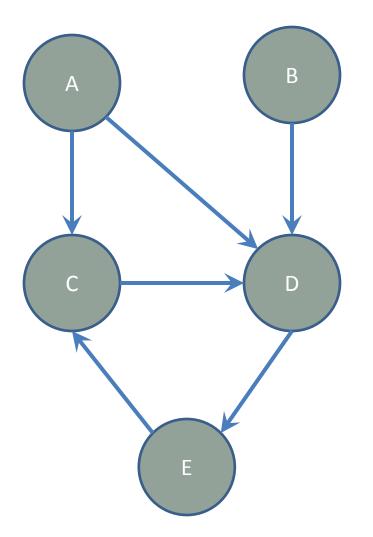

Where is my code?

- Main repo: /projects/instr/etc
 - Not human readable
 - You can't see files here
- Personal computer: any directory, via Subclipse or other
 - Working copy: add and edit files here
 - Must check in files for them to go to the repo
- attu working copy: /homes/iws/CSENETID/ or other
 - Just another working copy, same as personal computer
 - Must svn update to see changes from pc/repo
- validate copy: attu directory/src/.../scratch
 - NEW WORKING COPY CHECKED OUT FROM REPO
 - May NOT be the same as attu working copy if attu wasn't updated

Concepts vs tools, 331 vs general

Graphs

Can I reach B from A?

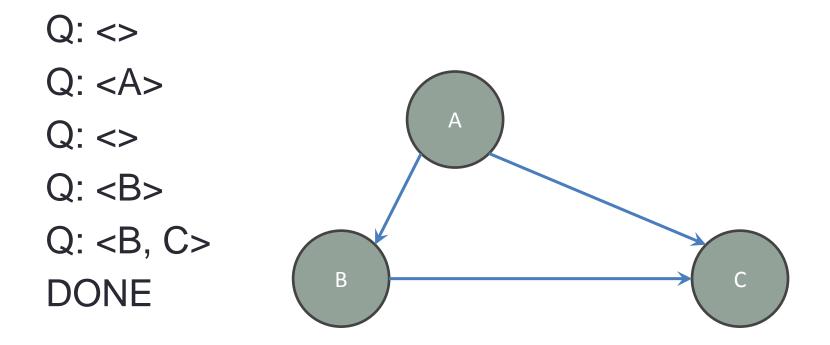

Breadth-First Search (BFS)

- Often used for discovering connectivity
- Calculates the shortest path if and only if all edges have same positive or no weight
- Depth-first search (DFS) is commonly mentioned with BFS
 - BFS looks "wide", DFS looks "deep"
 - Can also be used for discovery, but not the shortest path

BFS Pseudocode

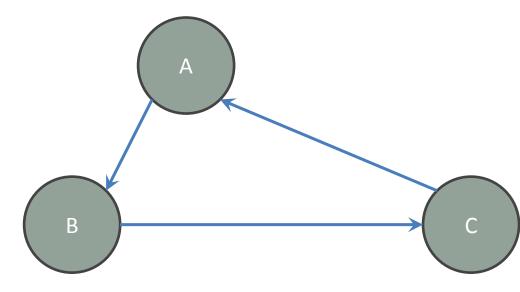

}

```
public boolean find (Node start, Node end) {
      put start node in a queue
      while (queue is not empty) {
            pop node N off queue
            if (N is goal)
                  return true;
            else {
                  for each node O that is child of N
                         push O onto queue
            }
      return false;
```

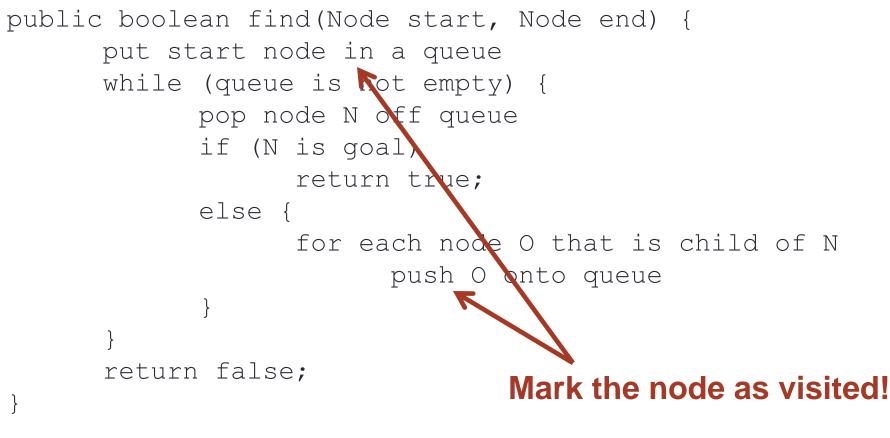

Breadth-First Search with Cycle

Q: <> Q: <A> Q: <> Q: Q: <> Q: <C> Q: <> Q: <A> **NEVER** DONE

BFS Pseudocode

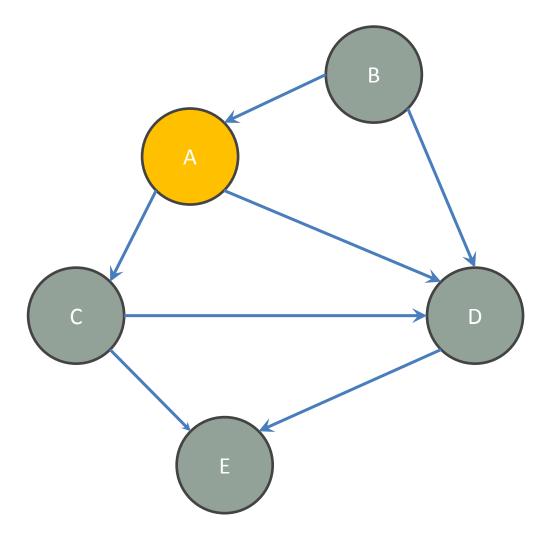

What if there's a cycle? What if there's no path between start and end?

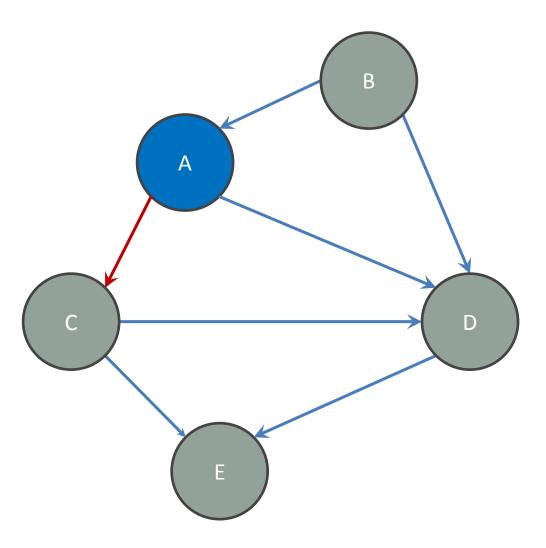

Q: <>

A С D Ε

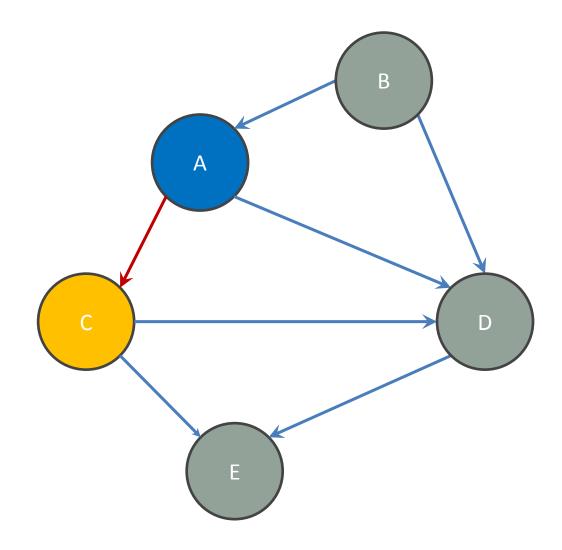

Q: <> Q: <A>

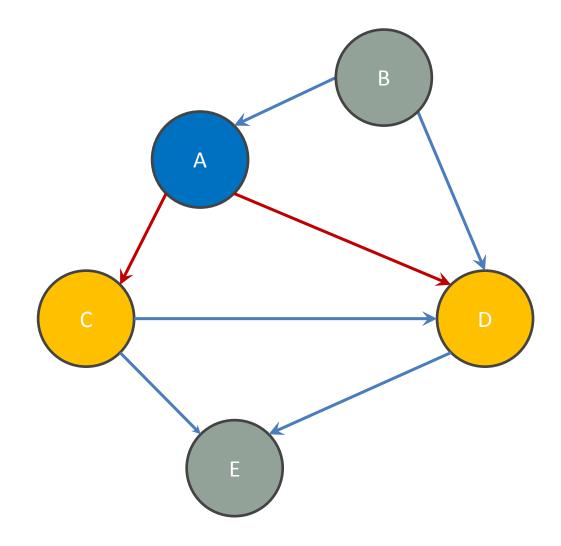

Q: <> Q: <A> Q: <>

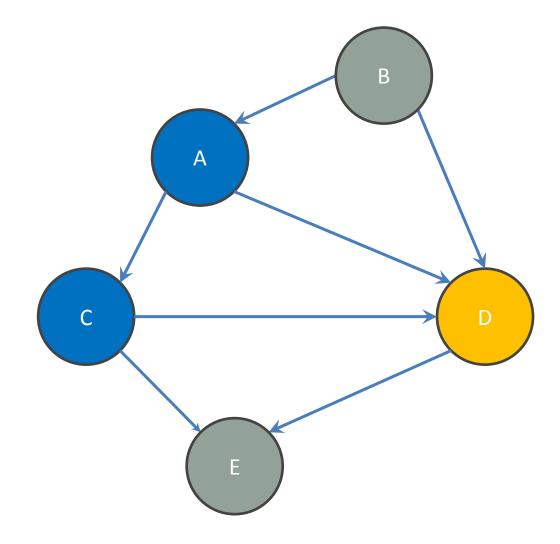

Q: <> Q: <A> Q: <> Q: <C>

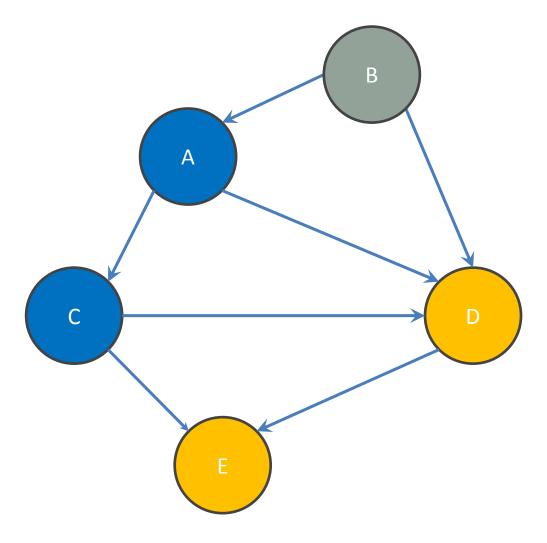

Q: <> Q: <A> Q: <> Q: <C> Q: <C ,D>

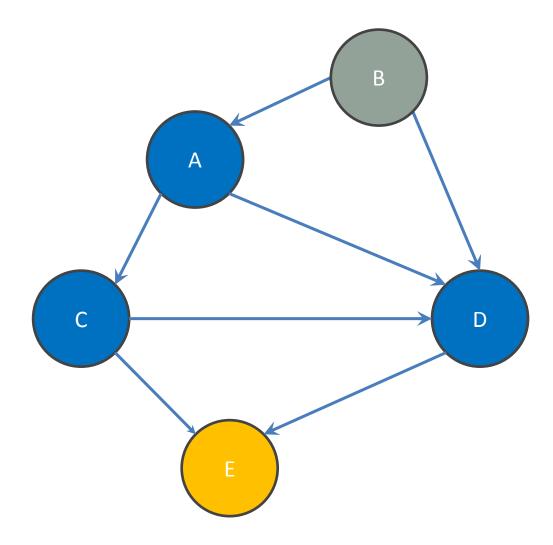

Q: <> Q: <A> Q: <> Q: <C> Q: <C ,D> Q: <D>

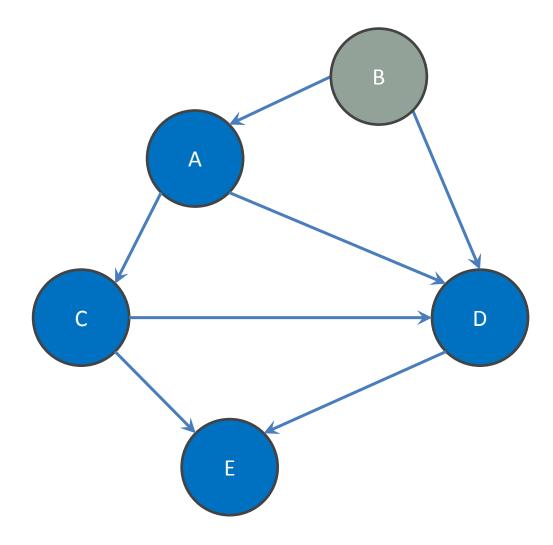

Q: <> Q: <A> Q: <> Q: <C> Q: <C ,D> Q: <D> Q: <D, E>

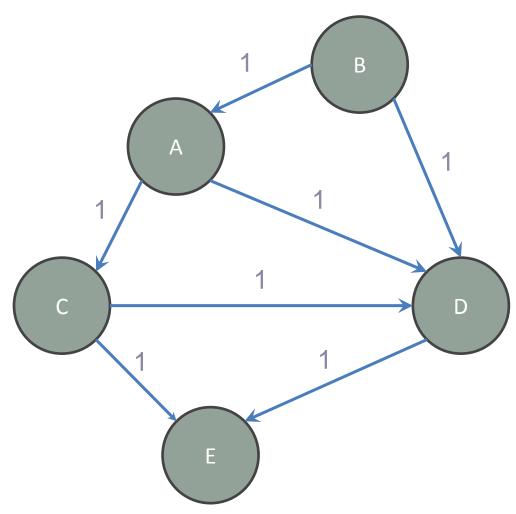

Q: <> Q: <A> Q: <> Q: <C> Q: <C ,D> Q: <D> Q: <D, E> Q: <E>

Q: <> Q: <A> Q: <> Q: <C> Q: <C ,D> Q: <D> Q: <D, E> Q: <E> DONE

Shortest Paths with BFS

From Node B

Destination	Path	Cost
А	<b,a></b,a>	1
В		0
С	<b,a,c></b,a,c>	2
D	<b,d></b,d>	1
E	<b,d,e></b,d,e>	2

Shortest Paths with Weights

Path

<B,A>

<B,A,C>

Classes, Interfaces, and Types

- The fundamental unit of programming in Java is a class
- Classes can extend other classes and implement interfaces
- Interfaces can extend other interfaces

Classes, Objects, and Java

- Everything is an instance of a class
 - Defines data and methods
- Every class extends exactly one other class
 - Object if no explicit superclass
 - Inherits superclass fields
- Every class also defines a type
 - Foo defines type Foo
 - Foo inherits all inherited types
- Java classes contain both specification and implementation!

Interfaces

Pure type declaration

public interface Comparable {
 int compareTo(Object other);
}

- Can contain:
 - Method specifications (implicitly public abstract)
 - Named constants (implicitly public final static)
- Does not contain implementation
- Cannot create instances of interfaces

Implementing Interfaces

- A class can implement one or more interfaces class Kitten implements Pettable, Huggable
- The implementing class and its instances have the interface type(s) as well as the class type(s)
- The class must provide or inherit an implementation of all methods defined by the interface(s)
 - Not true for abstract classes

Using Interface Types

- An interface defines a type, so we can declare variables and parameters of that type
- A variable with an interface type can refer to an object of any class implementing that type

```
List<String> x = new ArrayList<String>();
void sort(List myList) {...}
```

Guidelines for Interfaces

- Provide interfaces for significant types and abstractions
- Write code using interface types like Map instead of HashMap and TreeMap wherever possible
 - Allows code to work with different implementations later on
- Both interfaces and classes are appropriate in various circumstances

Demo Parsing the Marvel data
