Vision

1. Social Networking among people who belong to a groups, clubs or community organizations.
2. A growing sense of 'sharing' resources amongst the people.
3. The idea that book-owners need not sell their books but pass them on to a friend, and could even find interesting books among their friends all the way.

States for the Books

Modes of Transit

Development

- Web Frontend
 - User Interface (HTML/CSS/JS)
 - Custom content (PHP)
- Web Server (ASP.NET/IIS 7.0)
- Application Logic (C# 3.0/.NET 4.0)
- Server Backend
 - Database (MySQL)

- Testing Challenges
 - Validation
 - Big enough test group to establish network effects
 - Verification
 - Existing test frameworks for web technology
