- 5 Habits of Successful Startup Engineers (David Creemer, Flipboard)
- Internships: Why a Startup Is a Great Place for One (Robert Wu, Wibidata)
- Sift Science, Jason Tan
- Question and Answers

Why do a startup?

There are some great big technology companies to work for...

...but are there even better alternatives?

Non-technology companies

Mid sized companies

Small companies

Starting your own company

Smaller and smaller...

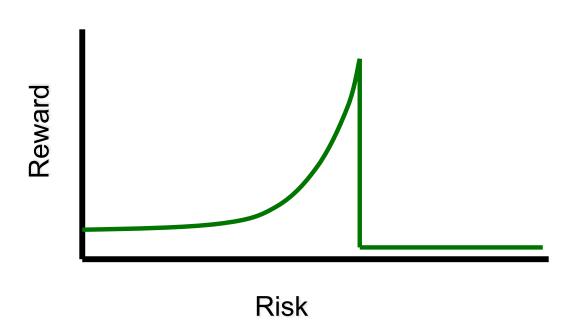

Why smaller?

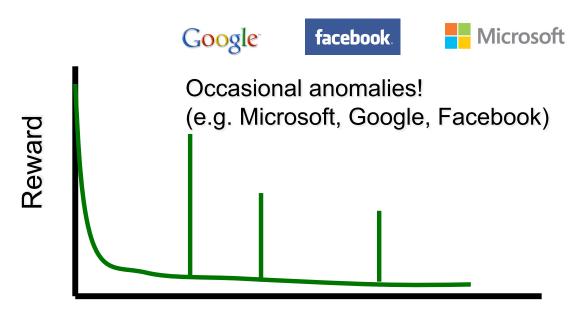

- You are passionate about an idea (you have an itch you want to scratch)
- You have a business idea.
- You have a competitive desire to win
- You have the time
- You have cohorts
- You don't want to work for "the man"
- You think big
- Financial reward!

Aren't startups risky?

Why: Risk vs. Reward

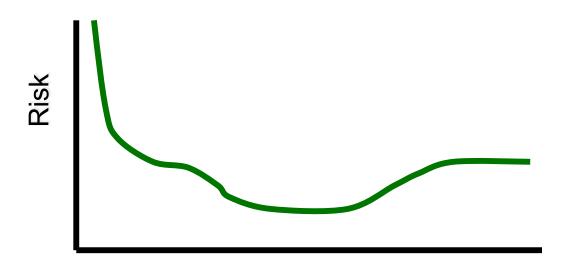

Why: Size vs. Reward

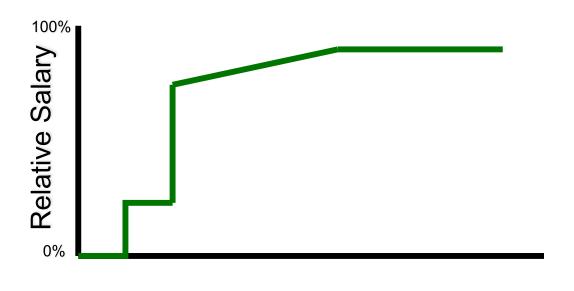

Size of company

Why: Size vs. Risk

Size of company

Why: Size vs. Salary

Size of company

Why: Size vs. Marketability

"Being responsible for a gigantic failure and learning from it is a highly valuable experience" 0 employees

"I'd rather hire someone that has failed in startup than someone that took the 'safe' path of a big company" Size of company

Are startups risky?

- External risk
 - Family, stability, structure, time
- Internal risk
 - Financial
 - Skills
 - Diversity
 - Marketability
 - Career development ???

Enough.

Let's find out why a startup might be right for you!
