

# OneStepCloser

Connected with friends. 身边信息 一手掌握

Define a new lifestyle. 约炮神器 超越陌陌

# Motivation, Functionality, Architecture

- Where are my friends right now? What are they doing?
- Are there any interesting people or events around me?
- Real time location -- Google Maps API
- Events and friends nearby -- SQL Database
- Chat with each other -- Facebook Chat API
- Event calendar -- Google Calendar API

# Challenging & Interesting parts

- Manage the different accounts and credentials for Google and Facebook
- Real time locations and events -- Determine when these are no longer valid.
- Integration of sub-projects -- implement the features one by one or focus on core functionality simultaneously
