

MP3 Finder

The Only Tool You Will Need
To Find Quality Mp3's

By Jay Kim, John Huang

Design Goals

- Fast, easy, high quality mp3-searches
 - Customize wrappers for mp3 donor-sites for high accuracy
 - Store only artists, title, and URL in the DB
 - User can grab and go
 - Instant page-update
 - Remote ASP

Customized Wrappers

- Good:
 - 100% accuracy. No need to make random guesses about what's a song title and what's an artist name.
 - Never miss a song you want. By wrapping enough donor-sites it is possible to grab all the popular demanding Mp3's known in on the net.

Customized Wrappers

- Bad:
 - Time consuming
 - Rebuild wrapper if the sites are reconstructed
 - Dead link problem
 - File extension misleading
 - .jpg, .zip, .css, .class ...etc.
 - Slow crawling
 - if all files physically stored on the donor-site, due to the politeness constrain

Simple Interface

Welcome to MP3 finder

Please enter a song title, an artist name or a keyword to find an MP3 file

Artist Name

- Easy to operate
 - People are lazy. Therefore the simpler the interface, the more willing they are to use our product.
- Easier to read (see [screen shot](#))

Advanced Technology

- More client-side processing
 - Remote ASP
 - Updates the page instantly
 - No waits for CGI to return
 - JavaScript
 - Error-checking before submit queries
 - Parsing data
