

490d – 2/5/2014

Project Exploration

Who are the users and what are their characteristics? (level of education, familiarity with technology, language)

What is the environment like? (power, temperature, internet, cell connectivity)

What are the cost constraints? (severe, moderate)

What are the key technical challenges?

What are the technologies that might be useful?

What do you need more information about?

How would you validate this approach?

How would you do deployments?
