Lag between data collection and actionable information

Data collection could provide much richer information

Courtesy of
NOAA

Paper-based practice in low-income regions limits the scale, complexity and impact of interventions.

Important features are lost when using basic technology

Domain-specific tools are inflexible and keep data siloed

ODK Ecosystem: Tools designed to fit together

ODK Ecosystem: Design your system in about an hour

“[ODK] is used for patient data gathering, and to give an exam after watching a video course on the phone.”

Johns Hopkins Center for CGHE

“Features sometimes trump cost...we needed to get more out of the phone and ODK allowed us to do that.”

D-Tree International

“It is relatively easy to train using ODK...even for people who have little or no computer experience.”

Berkeley Human Rights Center

“[Health workers felt] the system facilitated their home visits and allowed them to collect higher quality data. We actualized higher cost savings over our previous PDA-based system.”

USAID-AMPATH

- **Johns Hopkins: Ease of integration with a larger set of mobile and server tools.**
- **D-Tree: Impetus is backwards compatibility and added functionality of smartphone.**
- **HRC: ODK's cost of deployment, ease of training and ability to customize.**
- **AMPATH: Need to integrate with a medical record system, training and cost-effectiveness.**

Deployments: Over a thousand active users of ODK around the

Community: Individuals and organizations are contributing to ODK

EpiSurveyor passes 100,000 uploads!

JOEL SELANIKIO ON 29 NOVEMBER 2010 - 9:59AM

100k!

I remember a few years ago, when EpiSurveyor was a program that you had to install on your

Windows computer, with a mobile platform that used Palm Pilot PDAs instead of mobile phones.

Back then, DataDyne staff was involved in training ministry of health users in about 10 sub-Saharan African countries.
