

Appendix A: Graduate student statistical summary (from the Graduate School)

Attached are summaries provided by the Graduate School for our full-time graduate program and our Professional Masters Program.

Departmental views of this information are provided in Section III and in Appendices K and L. The Graduate School does an outstanding job of data collection and reporting, but each department has some idiosyncrasies that can't possibly be reflected in standardized reports. (One example: We began, this year, to supplement TA salaries up to the level of RA salaries using departmental discretionary funds. Because of the way the payroll system is coded, these relatively modest supplements show up as "Fellowships" in the standardized reports. And since these students are also receiving TA funding, they are double-reported.) In our own material, we have done our best to provide an accurate "departmentally tailored" view of the information.
