Hot stripping coqs

1 Name: **Anonymous** : 2012-04-26 17:03

Hello proggers.

How do I discharge this goal in Coq?

Inductive type : nat -> Set := ctor : forall n, type n.
Goal forall n, type 0 <> type (S n).

2 Name: **Anonymous** : 2012-04-26 18:20

discharge my anus

3 Name: **Anonymous** : 2012-04-26 18:48

Using the UW Information Technology Web Servers
UW Information Technology provides a suite of Web servers for use by the UW community. This Web site provides an online manual for creating and publishing Web pages on these Web servers.

Server Upgrade Planned
UW-IT is upgrading the faculty, staff, depts, and courses web servers, with a scheduled completion date of May 3rd, 2012. We strongly recommend waiting until the upgrade is complete before setting up a new MySQL server or website that relies on MySQL. If you proceed now, you will need to do extra work to accomodate the server upgrades.

Learn More about the Upgrade

Getting Started

Getting Started
Find a Web server to host your Web site, create your initial home page, and learn about HTML and Web authoring tools.

Web Training and Design Services

Quick Index
Find topics using this

```
ase report any problems with the ./bin/mysqlbug script!

 latest information about MySQL is available on the web at
p://www.mysql.com
port MySQL by buying support/licenses at http://shop.mysql.com

RTING DATABASE, RUN sh mysql_setup_2.sh TO CONFIGURE PASSWORD AND PHP ACCESS
t=55565 Be sure to remember this!
h-3.2$ Starting mysqld daemon with databases from /da23/d64/shinyy/mysql/data

h-3.2$ 
```

MySql not initially setup
(run my scripts
mysql_setup_1.sh
and mysql_setup_2.sh
in the user folder)

NICE!

now
PART 2 . . .

Creating the database + tables

Some syntax:

CREATE DATABASE name;
CREATE TABLE name(name TYPE PARAMS,...);

SQL Datatypes:
INT
VARCHAR(number)
TEXT
TIMESTAMP
BLOB
(and many more...)

Params:
NOT NULL
AUTO_INCREMENT
*DEFAULT 'string'*
DEFAULT CURRENT_TIMESTAMP

Misc
PRIMARY KEY(name)   *<-- insert in place of a property def*

Getting the database info to the php:

2 modes:

View threads

(if "threadid" not set in GET params)

Name: [   ]   [Reply]
Subject: [   ]

Submitting posts:

Name: [_____]   [Reply]
Subject: [_____]

[   ]
[   ]
[   ]
[   ]

Two modes:
Submit from threads page
(make a new thread)

Submit from posts page
(make a new reply in the
current thread)

Set the form action to self (with "?threadid=")
(Also set method to "POST")

Why?

Misc:

Post count?

SELECT COUNT(*) FROM posts WHERE thread_id = $tid;

Problems?

sql injections
pagination
